

Disclaimer

Contents

The contents of this website and the information presented are carefully selected and regularly updated. Nevertheless, errors and lack of completeness cannot always be avoided. PSB Systems therefore accepts no liability or guarantee regarding how up-to-date, correct or complete the information presented on this website is, and reserves the right, without previous notification, to make amendments or supplements. The use of the contents of the website is at the user's own risk. By merely using the website, no contract between the user and the PSB Systems company comes into force.

In addition, the technical values mentioned on the website are average values which have been established in trials under customary laboratory conditions. We reserve the right to deviations within normal commercial practise. These specifications do not constitute a warranty and do not release the end-user from undertaking suitability tests under reigning ambient conditions.

All the illustrations shown and offered on the Home Page are non-binding, in particular as regards design, size and colour of the products. We reserve the right to make modifications in technology and design. We reserve the right, without previous notification, within appropriate and reasonable limits, to undertake modifications which are to the benefit of technical progress, including on articles which have already been ordered. The details and technical data contained in catalogues and in other written material, as well as on data media or, for example, in drawings, sketches or drafts are to be checked by the purchaser or alternatively by the planner before acceptance and use. No claims can be made against PSB Systems based on these documents or any other advisory service. Errors and omissions excepted.

Links

The website contains what are called "external links" which point to third party pages in the Internet.

PSB Systems is not responsible for the contents of third party websites. When the links were originally created, PSB Systems checked the external contents for possible legal violations. At that time no legal violations were apparent. PSB Systems has no influence on the current and future design and contents of the linked pages. It is unreasonable to expect PSB Systems to constantly monitor external links for legal violations without specific indication thereof. If legal violations come to our knowledge, such external links will be deleted immediately.

Limitation of liability

The liability of PSB Systems for damages - on whatever legal basis - is precluded.

This does not apply in the event of:

- intention,
- gross negligence on the part of the governing body or of senior executives,
- culpable injuries to life/body/health,
- defects which PSB Systems has maliciously concealed,

- insofar as PSB Systems has given a warranty for a particular characteristic of an article of sale,

as well as in the event of defects of an article of sale, insofar as the supplier is liable for damage to persons or to property to privately used objects under the Product Liability Act.

In the event of culpable fundamental breach of contract PSB Systems accepts liability even in the event of gross negligence on the part of non-senior executives and in the event of slight negligence, in the latter case however limited to reasonably foreseeable damages typical for the contract. Further claims for damages are precluded.
